**America Needs Secure Borders !!!**

## **Do We Know Who Is Entering Our Country?**

Illegal vehicle traffic moves FREELY on our southern borders, and nobody knows what they are bringing with them. We need legislation imposed on Mexican motor carriers. A strong enforcement measures and protection for American motorists, English language proficiency standards, database security, background and criminal history. If Mexican truckers are unable or unwilling to meet these requirements, they should not be allowed to cross into the U.S.

The DOT is trying to start a pilot program of Mexican Truckers. The pilot programs that would authorize up to 100 Mexican motor carriers – with an unlimited number of trucks – to perform long-haul operations within the U.S. There are groups that has lawsuits seeking an injunction of the program until the DOT and FMCSA comply with the law providing public notice of the pilot program and an opportunity for the public to comment. You can also get information from DOT, FMCSA and Federal Register.
